

# SCHWEIZER SERVICE LETTER

**SUBJECT: SERVICE FACILITIES, FOR CORROSION DAMAGE INSPECTION AND REPAIR OF THE MAIN ROTOR DRIVESHAFT PART NUMBER 269A5305. REFERENCE SERVICE BULLETIN B-243.**

Schweizer Aircraft Corp. (SAC) is offering full inspection and repair services for compliance with Service Bulletin B-243. Although not required by Service Bulletin B-243, a coating of manganese phosphate will be offered only by SAC. The manganese phosphate is currently applied to all new manufactured drive shafts prior to prime and paint. Contact SAC Product Support for associated pricing and turn around time.

For your convenience, Schweizer has compiled below a list of field service facilities that have notified Schweizer that they have the resources available to comply with the subject inspection and repair procedures. Please contact the service facility most convenient to you for price and turn around quotations.

Schweizer Aircraft Corp., does not warrant or otherwise take responsibility for the capabilities or workmanship of the field service facilities listed herein.
