

# SCHWEIZER SERVICE LETTER

**SUBJECT:** NEW SA-269K-101 FUEL SYSTEM VENT KITS

**MODELS AFFECTED:** Models 269A, 269B, 269C and 269C-1

**COMPLIANCE:** At Owner/Operator's Discretion.

Schweizer Aircraft has designed the SA-269K-101 fuel tank vent system that is intended to minimize fuel spillage through the vent in the event of an aircraft rollover. This system contains a fitting with a check ball, which closes the fuel vent if a helicopter rollover takes place. The kit comes in four different configurations depending on the type of fuel system installed.

- SA-269K-101-01 25 gallon single tank with angled vent.
- SA-269K-101-03 25, 30, and 35 gallon single tank with vertical vent.
- SA-269K-101-05 49 gallon system (30 and 19 gallon tanks).
- SA-269K-101-07 65 gallon system (35 and 30 gallon tanks).

Contact your nearest authorized Schweizer Distributor or Service Center for price and availability information.
